

# Delivering Critical Mission Outcomes in Partnership with VMware

## ABOUT OUR VMWARE PARTNERSHIP

Our relationship with VMware is always evolving to support the federal government's drive towards digital transformation. We remain ahead of the curve to help our customers eliminate IT complexity, innovate faster with simplified operations, and accelerate adoption across the entire IT lifecycle. As a trusted VMware partner, we understand the needs of our federal customers and the constituents they serve. As the pace of innovation increases, clients trust Presidio Federal and VMware to put their mission success front and center.

## ABOUT PRESIDIO FEDERAL

Presidio Government Solutions LLC, branded as Presidio Federal, is an IT services and solutions provider focused on mission outcomes. Our comprehensive solutions for federal government agencies consider their mission and support their mandated need to modernize. While securely collaborating with our technology partners we ensure that agencies can harness technology advances, simplify IT complexity and optimize their environments. We do this while also enabling future applications, effective user experiences, new revenue opportunities, continuous improvements, and ongoing support.

*As the pace of innovation increases, clients trust Presidio Federal and VMware to put their mission success front and center.*

VMware technology allows federal agencies to expand their digital government capabilities with modern IT and ultimately, run any app on any cloud from any device to increase mission agility and speed digital capabilities with VMware multi-cloud and modern app solutions.

**Increase Operational Agility and Flexibility**

Standardize infrastructure and operations on one digital foundation across on-prem, cloud, and edge environments to quickly respond to evolving end-user requirements on demand.

**Accelerate Innovation**

Modernize application architecture. Strengthen in-house software development and delivery capabilities and attract talent with a culture of innovation.

**Achieve IT Resiliency and Continuity**

Operate secure, resilient, and cost-effective apps and infrastructure by design. Increase availability with scalable and flexible IT architecture.

**Maintain Security and Compliance**

Innovate without risk. Leverage the virtualization layer of the IT infrastructure to operationalize Zero-Trust security across on-premises, cloud, and edge environments.

**VMWARE MULTI-CLOUD & SECURITY SOLUTIONS:**

**Endpoint Protection Platform**

Cloud native endpoint, workload, and container protection platform that combines the intelligent system hardening and behavioral prevention needed to keep emerging threats at bay, using a single, easy-to-use console.

**VMware Carbon Black + Cloud Workload**

Reduce the attack surface and protect critical assets with purpose-built workload protection for the modern data center.

**VMware Cloud Foundation**

Power all of your applications across private and public cloud with VMware Cloud Foundation with Tanzu, a single hybrid cloud architecture that benefits both IT operators and app teams.

**Tanzu**

Outcomes matter. VMware Tanzu gets your apps to production in the most secure government clouds.

**VSAN**

Reduce storage cost and complexity with VMware vSAN, an enterprise-class storage virtualization software that provides the easiest path to HCI and hybrid cloud.

**VxRail**

Deploy and operate an IT environment that takes full advantage of the innovation taking place across the industry – without the complexity of piecing together and supporting a wide range of patchwork.

**WorkspaceOne**

Intelligence-driven digital workspace platform that enables you to deliver and manage any app on any device, anywhere simply and securely.
