

Enabling Modern Federal Courtroom Technology Solutions

“How can the judiciary develop, operate, and secure cost-effective national and local systems and infrastructure that meet the needs of court users and the public for information, service, and access to the courts?”

Source: [The Long Range Plan for Information Technology](#)

At Presidio Federal, we are proud to partner with leading edge OEMs to enable agencies in developing and deploying government owned and operated systems and in providing managed services.

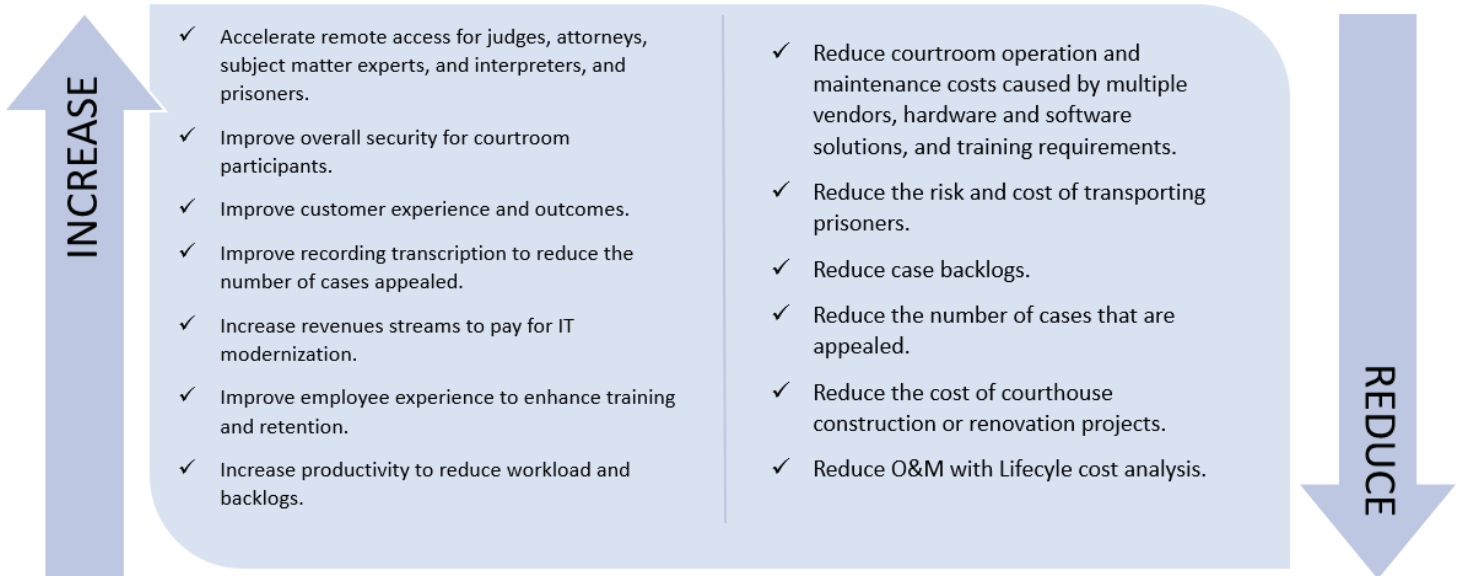

Are you looking to create an end-to-end technology platform that enhances the in-person court experience, simplifies virtual hearings and allows for a state-of-the-art Hybrid experience?

Presidio Federal's purpose is to be your dominant provider of critical communications, technology, and security solutions to support your mission. We strive to achieve world-class standards in delivering quality, reliable, on-time, accurate and customized solutions, and services.

COURTROOM TECHNOLOGY CHALLENGES

From the implementation of new executive orders to digitization of regulations and performance metrics and continuing security infrastructure concerns, we understand there are ever-evolving challenges for our U.S. Federal Court system. The nation's court system is often asked to more with less and meet one of the most important missions of the federal government – protect the rights of its citizens - one nation, indivisible, with liberty and justice for all.

Business Outcomes & Returns on Investment

COURTROOM TECHNOLOGY SOLUTIONS

The COVID-19 epidemic presented the information technology public private partnership with a myriad of challenges requiring mitigation so that governmental operations could continue. These challenges created opportunities to embrace technology that solve problems and better meet missions. Ultimately, we provide an affordable solution that enables a seamless experience while ensuring all connections are truly secure.

Presidio Federal is a mid-tier federal systems integrator with 30+ years of experience supporting the federal government's IT modernization journey. We leverage our lessons learned, customer experience, and credentialed team of solution architect to help evaluate courtroom challenges and solutions.

Our team is pleased to have experience supporting courts with:

- Building a roadmap and budget for the comprehensive retooling of court IT systems, legacy applications, and accompanying infrastructure leading to reduced operation and maintenance costs
- Developing and deploying low-risk turnkey government managed solutions
- Building and maintaining robust and flexible technology systems and applications
- Creating a system-wide approach to the utilization of technology
- Continuous improvement of security practices
- Creating a mobile courtroom to reduce backlogs
- Utilizing shared and managed services
- Improving data management, data security, and cloud strategies
