## ABOUT PRESIDIO FEDERAL

**Presidio Federal, a wholly owned subsidiary of Presidio, is a mid-tier integrator that is exclusively focused on federal government**. We work with large prime contractors as well as small businesses to become a sort of "easy button" for our federal customers.

We are proud to be an outcome focused, trusted advisor with a credentialed team that has experience and understanding with the legacy systems and unique challenges of government agencies.

Our comprehensive solutions – spanning from cybersecurity, cloud, collaboration, automation, augmentation, digital infrastructure, and data center – provide advanced technology for federal agencies to consider that support their mission as well as agencies' mandated need to modernize.

While, IT modernization is part of the solution we provide, we understand that the government also needs a partner who helps them anticipate, advocate, solve, execute. We have an extensive partner ecosystem, including many of the best-of breed OEMs in the business, but we layer in an unbiased, broad perspective that is driven by mission and a long-term, accountable relationship.
