

ABOUT PRESIDIO FEDERAL

Presidio Federal, a wholly owned subsidiary of Presidio, is a mid-tier integrator that is exclusively focused on federal government. We work with large prime contractors as well as small businesses to become a sort of “easy button” for our federal customers.

We are proud to be an outcome focused, trusted advisor with a credentialed team that has decades of experience and deep expertise of the legacy systems and unique challenges of government agencies. Additionally, our parent company, Presidio, has worked to resolve challenges and provide solutions in some of the largest companies in the private sector. We bring this broad perspective and business foresight to our federal customers.

We take the time to understand where you’ve been and where you’re going. We bridge the gap between traditional IT environments and an automated, digitally-transformed future.

Our comprehensive solutions – spanning from cybersecurity, cloud, collaboration, automation, augmentation, digital infrastructure, and data center – provide advanced technology for federal agencies to consider that support their mission as well as agencies’ mandated need to modernize. Our team fills in gaps, removes hurdles, optimizes costs, and reduces risk.

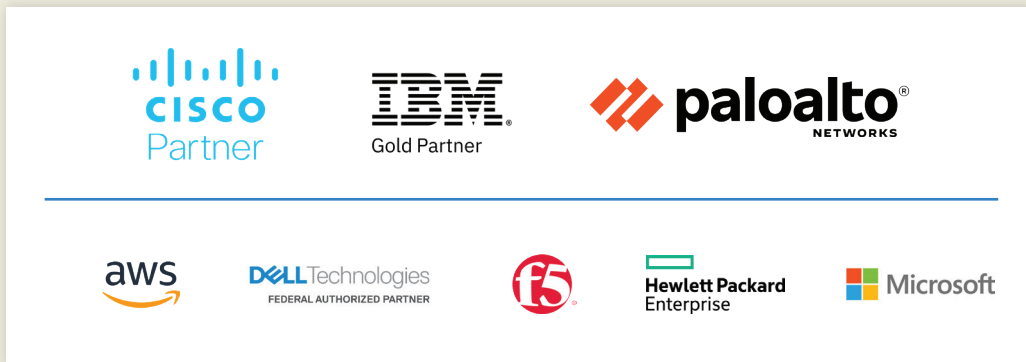

While, IT modernization is part of the solution we provide, we understand that the federal agencies also need a partner who helps them anticipate, advocate, solve, and execute.

Alongside of our extensive partner ecosystem, featuring many of the best-of breed OEMs in the business, we layer in an unbiased, broad perspective that is driven by mission and a long-term, accountable relationship.

Our team gets involved at all levels to earn your trust and deliver innovative, high-quality results at the speed your agencies need for mission success. We don’t flinch at complex problems. We guide agencies into the future through innovative solutions, custom applications, actionable data insights and leading-edge managed services.

CORE CAPABILITIES

AUGMENTATION

- [Video](#)
- [Unified Communication](#)
- [Wireless](#)
- [Networking](#)
- [Compute](#)
- [Data Center](#)
- [Workforce Transformation](#)
- [Multi-Tier Help Desk Support](#)

AUTOMATION

- [Workflow Analysis](#)
- [Workflow Design](#)
- [Workflow Automation Implementation](#)

CLOUD

- [A&A Strategy](#)
- [Workload Migration](#)
- [Private-Hybrid-Multi Cloud](#)
- [Infrastructure As Code](#)
- [Data Migration & Exploration](#)
- [Data Center Migration](#)
- [Migration in a Box](#)
- [Edge Computing](#)

COLLABORATION

- [Unified Communication and Collaboration](#)
- [Video Conferencing and Remote Telework](#)
- [Recording & Event Services](#)
- [Collaboration Interoperability](#)
- [E911](#)
- [Contact Center](#)

CYBERSECURITY

- [Segmentation](#)
- [Endpoint Detection and Response / Network Detection and Response](#)
- [Security Information and Event Management / Security Orchestration, Automation, and Response](#)
- [Identity Access Management](#)
- [Zero Trust Architecture](#)
- [Risk Management Framework](#)
- [Trusted Internet Connections](#)

DATA CENTER

- [Data Protection](#)
- [Compute](#)
- [Storage](#)
- [Converged/Hyperconverged](#)
- [Hybrid Cloud](#)
- [Networking](#)

DIGITAL INFRASTRUCTURE

- [Enterprise Networking](#)
- [Enterprise Wireless](#)
- [Data Center Network Infrastructure](#)
- [Network Telemetry](#)
- [Software Defined Networks](#)
- [Zero Trust Network Architecture](#)
- [Cloud Integration](#)
